

We listen to K-LOVE on FM107.1 and FM92.9 here in the Eugene area. K-LOVE supports wholesome values and has a positive and encouraging impact on our community as well as communities all across America. It is in the public interest to allow K-LOVE to continue to operate because it contributes something positive to the lives of the residents of our area. Everyday listeners make comments on the air about how their lives have been changed for the good because they have been listening to the station and are encouraged by the message they hear. The station is totally supported by listeners, showing that thousands of people are willing to put their own money into something that makes such an impact and improves their lives. K-LOVE makes a difference in our community because it provides wholesome family-friendly programming that has a profound impact on so many people's lives.. Please do not enact the rule changes that would expand the LPFM stations allowing them to take priority over the current FM translator service and thereby force K-LOVE off the air. Thank you.
